

TOP 5 REASONS WHY YOU SHOULD JOIN A RESEARCH PROJECT

Help build the foundation for a better future.

SUPPORT

When you participate in research, you often get extra time with experts who are interested in learning about and helping your family.

DISCOVER

When your child has a rare genetic finding, the only way to learn more is by gathering information from as many people as possible, in a way that can be shared.

INTERVENTION

Research allows us to explore the health and behavior features associated with rare genetic changes. As we understand more, better intervention and medical management options can be developed.

BEST OUTCOMES

Research helps us to understand how to promote the best outcomes for all people with autism, seizures and other developmental delays. Prepare for your child's future by contributing information from today: Understanding your concerns allows researchers to work toward developing treatments.

FEEL GOOD

You may feel good about contributing to science in a way that will make the experience of having a rare genetic change easier for those following in your footsteps.

JOIN US. MAKE A DIFFERENCE.
